

Life Lugo + Biodynamic Program

News 2017

Interview on Radio Cerna to project leaders

Wed, 25/01/2017 - 13:37

Lugo + biodynamic: sustainable urbanism, ENIL (Natural Area of Local Interest) and quality wood.

The Life project "Lugo + biodynamic" aims, between now and 2020, to promote sustainable urbanism, to recover natural areas in industrial areas, to enhance autochthonous plant biodiversity, and to encourage chestnut and quality timber products. This Life project is one of the 27 proposals from municipalities selected by the EU to combat climate

change.

The first project of the plan Lugo + Biodynamic, a plantation of chestnuts, has been approved.

Fri, 27/01/2017 - 10:44

The local government board approved yesterday the planting of chestnut trees in a municipal 3.6 hectare plot located in the As Gándaras industrial park. This is the first project of the Lugo + Biodynamic plan, which has fundings from the Life program of the European Union.

Council involves the public in the European project Lugo + Biodynamic through web www.lugobiodinamico.eu

Tue, 21/03/2017 - 14:19
